ABHISEK DAS

Senior Java Backend Engineer | Lead API Developer | Spring Boot & Microservices

Kolkata, West Bengal, India | +91-7908026137 | das.abhisek@yahoo.co.in

PROFESSIONAL SUMMARY

Senior Java Backend Engineer and Lead API Developer with **14+ years** of experience designing, building and delivering scalable, fault-tolerant and resilient microservices across banking, insurance, telecom, automotive, credit reporting and pharma domains. Strong expertise in **Java 8/17/21**, **Spring Boot**, Spring MVC, Hibernate/JPA, **RESTful APIs**, **Apache Kafka**, multithreading and caching. Hands-on with CI/CD (**Jenkins, Docker, Kubernetes**), **Google Cloud Platform (GCP)**, IBM Cloud and Generative AI tooling (LangChain, LangGraph, RAG, AI Agents). Proven leader guiding cross-functional Agile teams from architecture through production delivery.

TECHNICAL SKILLS

Programming Languages: Java (8/17/21), J2EE, JavaScript, Node.js (Express.js), SQL, PL/SQL

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Struts, JUnit

Architecture & APIs: Microservices, RESTful Web Services, SOAP, API Gateway, Event-Driven Architecture, OAuth2, JWT, MuleSoft, RAML, OOP, Java Design Patterns, Multithreading, Caching

Messaging & Data Pipelines: Apache Kafka, Apache Airflow, Google Pub/Sub, Data Lake

Databases: Oracle, SQL Server, PostgreSQL, BigQuery, Data Fabric

Cloud & DevOps: Google Cloud Platform (GCP), Google Cloud Functions, IBM Cloud, CI/CD, Jenkins, Docker, Kubernetes, Maven, Gradle, Git, GitHub

AI & LLM: Generative AI, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), AI Agents, GitHub Copilot

Servers, Tools & Monitoring: Apache Tomcat, WebLogic, IntelliJ IDEA, Eclipse, SQL Developer, OIPA, SonarQube, JIRA, SoapUI, Grafana, Prometheus

Methodologies: Agile, DevOps, Release Management, Application Management Services (AMS)

PROFESSIONAL EXPERIENCE

Capgemini | Senior Software Engineer **Mar 2025 – Aug 2026**

Project: *Renault One Massification* ***| Client:*** *Renault France* ***| Role:*** *Lead API Developer*

- Led API development for an enterprise platform serving Renault France, building **Java 21 and Spring Boot microservices** and REST APIs.
- Built event-driven integrations with **Apache Kafka** and connected services to a Data Lake supporting AI/ML and digital twin capabilities.
- Implemented monitoring and observability with **Grafana, Prometheus** and structured logging to support service health and production troubleshooting.
- Drove code quality, maintainability and on-time delivery of scalable application components.

  Technologies: Java 21, Spring Boot, Kafka, Data Lake, AI/ML, Digital Twin, Grafana, Prometheus, Logging

LTIMindtree | Senior Specialist **Mar 2024 – Mar 2025**

Project: *Equifax USIS Tele Track Migration* ***| Client:*** *Equifax US* ***| Role:*** *Senior Web Developer*

- Implemented application **security features (OAuth2, JWT)** and improved performance for the Tele Track migration using Java 17 and Spring Boot.
- Developed data-processing workflows with **Apache Airflow, BigQuery, Pub/Sub and Google Cloud Functions** on GCP.
- Delivered story-pointed code changes end to end: created baseline changes, managed check-ins, built **Jenkins** pipelines and deployed packages to GCP.

  Technologies: Java 17, Spring Boot, Google Cloud Functions, Apache Airflow, BigQuery, Pub/Sub, OAuth2, JWT, Jenkins

IBM India | Senior System Analyst **Oct 2021 – Mar 2024**

Project: *AMC-IDC* ***| Client:*** *SPACCE, South Africa* ***| Role:*** *Lead API Developer*

- Led development of **REST API microservices** for add, update, get, activate and upload operations, plus API Gateway and Auth Service components.
- Built filter-based search for individual attribute lookup; ensured quality with **JUnit**, Git and **SonarQube**.

  Technologies: Java 8, Spring Boot, Node.js, JUnit, Git, SonarQube

Project: *HSBC Digital Servicing* ***| Client:*** *HSBC Bank, UK* ***| Role:*** *Lead API Developer*

- Led a migration project developing multiple **microservice endpoints** aligned to business functions, enabling customer service requests across application modules.
- Implemented security features and improved application performance; defined API contracts with **RAML/YAML** and integrated using **MuleSoft**.

  Technologies: Java 8, Spring Boot, Microservices, MuleSoft, RAML, YAML

Tech Mahindra | Tech Lead **Apr 2021 – Oct 2021**

Project: *To2G – CRM Salcus* ***| Client:*** *Telefónica* ***| Role:*** *Tech Lead*

- Led development of the Salcus CRM application that processes DSL order requests (mobile, Homespot, FixedNet, SIM, myHandy) received from multiple channels.
- Integrated with **SOAP web services** through SOA in the OSB data layer, handling inbound and outbound services and response processing; tested with SoapUI.

  Technologies: Java, SOAP, Oracle, SoapUI

Cognizant | Associate **Jul 2014 – Apr 2021**

Project: *Voya LASC – Maintenance* ***| Client:*** *Voya Financial* ***| Role:*** *Product Specialist*

- Delivered **Level 2 (L2) application support** for OIPA product lifecycle across multiple applications in Voya's life insurance product line.

  Technologies: Core Java, OIPA, PL/SQL Stored Procedures, Packages, SQL Server

Project: *MetLife* ***| Client:*** *MetLife, USA* ***| Role:*** *Product Specialist – Technical*

- Enhanced the **Rate Loader Tool**, updating the front-end view so new rates and the system date could be applied from a combined main landing page.

  Technologies: Eclipse, Core Java, Spring MVC, XML, Oracle, Tomcat

Project: *Harmony Development Project* ***| Client:*** *Cognizant Infra Service* ***| Role:*** *Application Developer*

- Developed features for **Harmony**, Cognizant's cognitive AIOps platform, enabling bi-directional integration with ITSM tools (ServiceNow, Remedy).
- Built REST APIs and application features using Java and Spring, with Angular UI, Jenkins builds and Docker containers.

  Technologies: Java, Spring, REST API, Jenkins, Docker, Angular, Eclipse

Project: *MSD Reach* ***| Client:*** *Merck Sharp & Dohme Ltd., Malaysia* ***| Role:*** *Application Developer*

- Developed integrations capturing doctors' activity and contact information from iSales and syncing it to the MSD application (Rep Email, Consent Update).
- Integrated with third-party **Lyris** using SOAP and REST APIs to load market data with existing contact consent, email address and privacy policy source.

  Technologies: Java, SOAP, REST API, JavaScript, JSP, CRM

Webel Support Multipurpose Service Co-operative Society Ltd. | Software Developer **Jul 2012 – Jul 2014**

Project: *GRIPS Project* ***| Client:*** *Finance Department, Government of West Bengal* ***| Role:*** *Java Developer*

- Developed modules of the web-based **GRIPS** e-portal used to collect government revenue through a centralized system.

  Technologies: Java, Struts 1.3, JSP, JavaScript, Oracle, WebLogic Server

KAN STS Pvt Ltd | Java Developer **Dec 2011 – Mar 2012**

EDUCATION

B.Tech, Computer Science & Engineering **2005 – 2009**

Bankura Unnayani Institute of Engineering, West Bengal, India CGPA: 7.84

CERTIFICATIONS

- **Salesforce Platform Developer I** – Cognizant Academy
